**Objective**

- Create a reusable jQuery plugin that allows to re-order items in a list through Drag & Drop.
- Allow to reorder a list of items where a single item can contain a Video (HTML5)
- Given a list of items (see below) you should be able to drag the item and reposition it in the list
- When hovering over the item you should see a "Move" cursor indicating that you can reorder the list.
- The list should contain a Video tag, some buttons and some metadata as shown below.
- The plugin should be must be able to be used in different contexts with any list of items.
- The plugin should allow key Events to be subscribed allowing the consumer of the plugin to subscribe to the event and make server-side calls.

Expected Output

- A valid XHTML page containing a layout similar to the above
- A valid CSS file
- A javascript file containing the jQuery Plugin
